[Vinnie Moore Advanced Lead Guitar Techniques Pdf 231](#)

Trouble Shooting continued...

- b) UV LAMP FLICKERING, ALARM ON
 - 1. Failed lamp.
 - 2. Incorrect starter (use only S300 electronic starter in SF800S, SF900S, SF940S, UV40-20 and UV75-25. SF1000S and UV130-40 has no starter).
 - 3. Incorrect lamp or ballast fitted.
- c) UV LAMP OUT, ALARM ON
 - 1. Lamp failed.
 - 2. Poor connection to lamp (check/clean connector/lamp pins).
 - 3. Starter failed or loose in socket (not applicable to SF1000S and UV130-40).
 - 4. Ballast failed (unlikely).
- d) LAMP ON, ALARM ON
 - 1. Faulty circuit board.
- e) LAMP OUT, ALARM OFF
 - Loose connection, faulty circuit board or possibly faulty lamp.

 **WARNING:** When servicing or attending your Steriflo®, always ensure power is switched off and lead unplugged. Electrical connections should be serviced only by qualified persons. If the electrical supply lead of this system is damaged, it must only be replaced by authorised Davey service personnel as special tools are required.

 Care should also be taken when servicing or disassembling the unit and associated pipework to avoid possible injury from pressurised water. Unplug power, relieve pressure by opening a tap on the discharge side of the unit and allow any water in the unit to cool before attempting to dismantle.

Service Parts

Replacement Lamp

Suit SF800S, SF900S, SF940S, UV40-20 & UV75-25 GPH840N/S
Suit UV130-40 and SF1000S GPH840N2/S

Sleeve

Suit SF800S, SF900S, SF940S, UV40-20 & UV75-25 QS834
Suit UV130-40 and SF1000S QS880

Quartz Sleeve Pressure Ring

S113

Starter

Suit SF800S, SF900S, SF940S, UV40-20 & UV75-25 S300
Suit UV130-40 and SF1000S No starter

Orings

All models S24x3N70 (2 per sleeve)

Lamp Connector

All models S114/2

10

Congratulations on your purchase of a high quality, Davey Steriflo® Ultra Violet water treatment system. All components have been designed and manufactured to give trouble free, reliable operation.

Your new Steriflo® system incorporates a lamp failure system design feature that enables you to be warned of a lamp failure by :-

1. A lamp failure red LED
2. An audible alarm
3. Remote alarm contacts (only in UV130-40 MkII and SF1000S)

In addition the UV130-40 mkII and SF1000S features a UV timer. When the alarm "beeps" on and off, the lamp is due to be changed so that effective treatment is maintained.

As part of the timing function, the red LED will flash quickly once every ten seconds, but the alarm will not sound. This is **not** a fault indication.

Before installing your new Steriflo®, please read all instructions carefully as failures caused by incorrect installation or operation are not covered by the guarantee. Your Ultra Violet water treatment system is designed to handle clean water. The system should not be used for any other purpose without specific referral to Davey. The use of the system with flammable, corrosive and other materials of a hazardous nature is specifically excluded.

 The appliance is not intended for use by young children or infirm persons without supervision. Young children should be supervised to ensure they do not play with the appliance

Preparing your system

On removing your Steriflo® system from its carton you should check all components, especially the lamp, to ensure all are present and have not been damaged in transportation. You should have :-

1. Power supply control box with indicator light and electrical flex.
2. UV lamp.
3. Treatment chamber with mounting brackets.
